Hours of Service Website

Q. When is the Daylight Savings Time designator inserted into the Driver Details page?

A. The designator will appear on the website at 2:00am on the DST day, after there has been a duty status change in Standard Time.

Hours of Service Website Example

Q. How will the Driver AOBRD Logs report show the DST change?

A. The Driver Logs report will show a "DST" designator under the Flags column during the time change. Driver Log

Hours of Service Driver Log Report Example

Q. How will ELD Logs Show the change to DST?

ELD logs are required to be produced in the current Time Zone so even though there was a Time zone change it will not be reflected in the log with the exception of the header where it will identify the time zone the drive was in at the start of day.

Q. How should an edit of a duty status that crosses the time change be performed?

A. When splitting a duty status that crosses the time change, edit only the duration of the duty statuses, not the actual start time of the duty status.

Edits across the time change cannot be done from the mobile unit. Edits over the time change can only be done by changing the duty status duration, so this type of edit can only be done on the HOS website.
