

Master portal release notes v4.17.0

Modified on: Tue, 18 Jul, 2023 at 3:19 PM

Master Portal

v4.17.0 (2023-07-18)

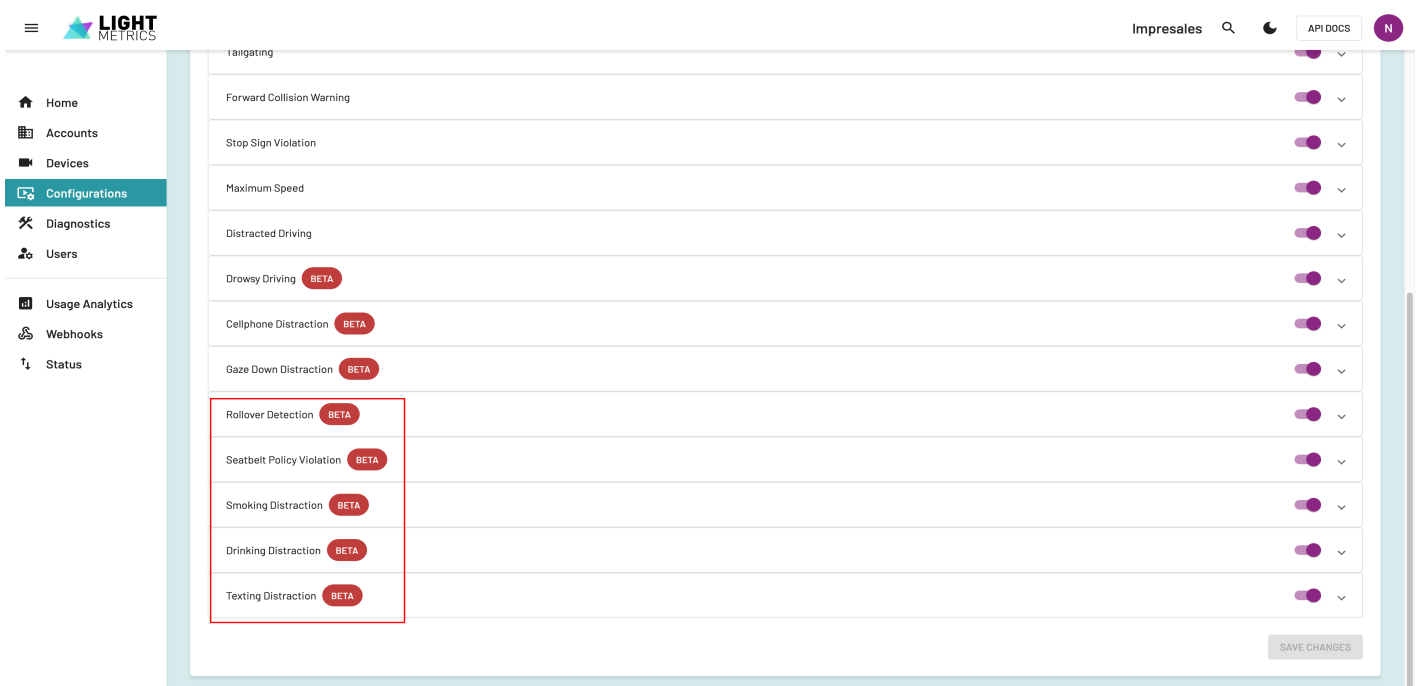

Changes:

1. New Safety Events: Added new safety events: Seatbelt Violation, Rollover Detection, Drinking, Smoking, and Texting Distraction (all in beta).
2. Enhanced Configuration: Introduced new asset-based configuration keys to determine the end of the trip if the asset is stationary.
3. Health Event: Implemented Camera Obstruction Detection as a new health event.
4. Metadata Column: Added a metadata column in TSP asset exports CSV file for better data analysis.
5. Diagnostics Enhancement: Display of voltage value under the Power Cut alert event and new events such as CPU, GPU temperatures, unexpected disconnect, and [many more](https://lightmetrics.freshdesk.com/support/solutions/articles/61000307810-release-notes-1-14-x) (<https://lightmetrics.freshdesk.com/support/solutions/articles/61000307810-release-notes-1-14-x>).

Bug Fixes:

1. Camera Sensor Reboot: Resolved the issue where the Master Portal displayed incorrect values for Camera Sensor Reboot.
