Compliance – Hours of Service

Improvements

Vehicle Connectivity Improvements

XRS-26852- ELD showing not connected to ECM Error

We resolved an intermittent issue where the Drive application displays an error that the connection to the vehicle is currently unavailable although the vehicle is connected to the device, thus causing the equipment validation to fail.

UVA Pending Edits Issue

XRS-27456 Drivers unable to complete login due to pending edits

We have mitigated an intermittent issue with the driver's ability to accept or reject certain pending edits. This mobile release will allow the drivers' normal workflows to continue as expected. Some edits reappear on subsequent log in actions, but the driver will be able to continue their normal daily workflow.

XRS-24762- XRS Mobile warning driver about carrier edits, "Unable to display new log edits received"

We resolved an issue with the UVA pending edits, where the driver was getting an inappropriate warning message about pending carrier edits and unable to display new log edits received, although there were no pending edits to be actioned.

Compatibility Requirements

Please refer to our minimum requirements for system components that are used with these solutions:

[Compatibility requirements for devices, operating systems, and browsers](#)

[Certified mobile devices](#)

[RNA routing and dispatch client specifications](#)
