Improvements

ERODS Transfer Issue

XRS-24498- Engine shutdown event with no vehicle ID - caused ERODS failure

We resolved an issue where the vehicle ID was missing from the engine shutdown event thereby resulting in an ERODS failure considering it as an invalid file.

Application Language Inconsistency

XRS-23541- HOS language reverts to English after changing it to French.

We resolved an issue where the HOS screens of the application were switching back from French to English displaying the application content in an inconsistent manner.

Compatibility Requirements

Please refer to our minimum requirements for system components that are used with these solutions:

[Compatibility requirements for devices, operating systems, and browsers](#)

[Certified mobile devices](#)

[RNA routing and dispatch client specifications](#)
