Omnitracs One – v6.8 Routing Client Release Notes

Omnitracs Routing and Dispatch Client v6.8.6.2

Release Notes
Updated January 18th, 2024

Contents

RNA – Omnitracs Routing and Dispatch client

Improvements

RPE-110708 – Client failing when users open Interactive Geocoder
We resolved an issue where the *Omnitracs Routing and Dispatch* client crashed when users tried to open the *Interactive Geocoder* in the scenario below:

The issue stems from a change in users' PC policies where the Omnitracs client is not permitted to use the local library (*rundll32.exe*). The updated version of the *Omnitracs Routing and Dispatch* client does not use that library by default.

Compatibility Requirements

Please refer to our minimum requirements for system components that are used with these solutions:
