

Master portal release notes v5.3.0

Modified on: Wed, 27 Dec, 2023 at 4:47 PM

Master Portal

v5.3.0 (2023-12-04)

Enhancements:

1. **Event Rate Limiting:** Discover our latest feature, Event Rate Limiting, designed to empower fleets in minimizing data expenses, ensuring a smart and efficient use of data resources.

Bug Fixes:

1. **Incorrect Message Post Account Addition:** Removed the incorrect message shown once a new account is added.

Reference Screenshots:

The screenshot displays the 'Configurations' page in the Light Metrics Master Portal. The 'GENERAL' tab is selected, and the 'Event Rate Limiting' section is highlighted with a red box. This section includes a toggle for 'Enable Global Rate Limiting' and input fields for 'Maximum' (10) and 'hours' (24). The 'Custom Event Settings' table lists three events: Custom Cornering, Custom Harsh Acceleration, and Custom Harsh Braking, all with 'ACTIVE' status.

Event Name	Event ID	Status	Actions
Custom Cornering	EXT_CUSTOM_CORNERING	ACTIVE	
Custom Harsh Acceleration	EXT_HARSH_ACCELERATION	ACTIVE	
Custom Harsh Braking	EXT_HARSH_BRAKING	ACTIVE
