

Omnitracs Tax Manager 1.6.1 Release Notes

Tax Manager 1.6.1 patch release includes the following software corrections for Lat and Long files that were missing from the Yukon Territory, Canada.

Overview

The 1.6.1 patch release of Omnitracs Tax Manager includes the following software corrections.

Software Corrections

Item Number	Release Notes	Component
TM-3958 & TM-3955	Some lat and long files were identified as missing from the Yukon Territory, Canada, this caused errors and prevented vehicles travelling in this jurisdiction from calculating distances during and after travelling in that jurisdiction. This issue has been corrected.	Tax Filing
