

OMNITRACS TAX MANAGER 2.0 RELEASE NOTES

Tax Manager 2.0 release includes Simplified User Management, Save User Preferences, Vehicle Distance Records Report, and Updated the Tax Manager login URL to TaxManager.Omnitracs.com.

Overview

We are pleased to announce that Omnitrac's Enterprise Services Tax Manager 2.0 release is available. This release includes new features, software enhancements and corrections.

New Features

Simplified User Management

TM-2455

Customers can manage their users through the Customer Portal or OT1.

Updated the Tax Manager login URL to TaxManager.Omnitracs.com

TM-3135, TM-3982

Users should start using the new Tax Manager login URL. When they use the previous URL, TaxManager.Omnitracs.com, the user will be redirected to the new URL. We highly recommend that you update your bookmarks to the new URL.

Save User Preferences

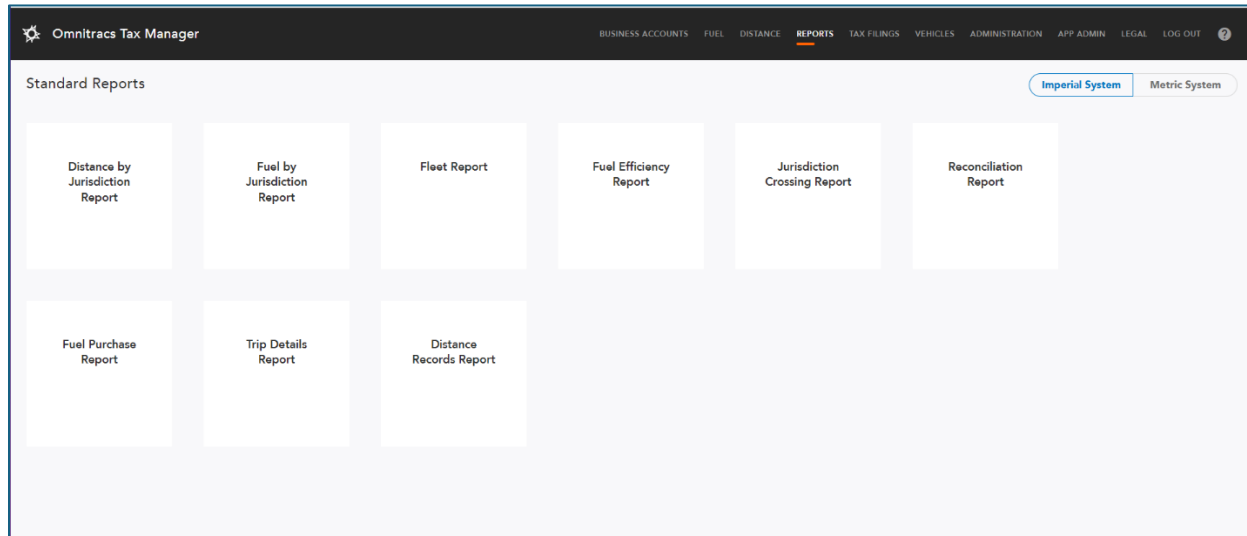

TM-3119

The Distance Fuel and Reports pages now save the users last filter preferences and will use those saved preferences when the user returns to the page.

Vehicle Distance Records Report

TM-3145

Tax Manager now provides the ability for the user to review and edit their distance data using a new Vehicle Distance Records Report to ensure accuracy before filing the report.

Improved Security

TM-3995

Security is always important to Solera and our customers. Improvements have been made to enhance our security protocols.

Software Corrections

Work Item Number	Issue	Component
TM-2494	Fuel Import Page has been improved to address upload issues when the file has blank rows. This issue has been resolved.	Tax Manager
