

# OMNITRACS TAX MANAGER 1.2 - NEW FEATURES AND ENHANCEMENTS

## Overview

Omnitracs Tax Manager 1.2 will be released on Friday, May 15, and will contain the following new features, enhancements, and software corrections.

## App Admin Tab

A new tab has been added to Omnitracs Tax Manager, **App Admin**. Currently, it contains the screens necessary for the administration of new tax accounts.

## Tax Accounts Screen

**Note:** Customers will now be required to create a company and assign trucks in order to create a tax filing.

The **Tax Accounts** screen allows you to add, edit, or delete tax accounts, which can be assigned or unassigned to your company's vehicles.

Additionally, when generating a new tax filing (in the [Tax Filing Screen](#)), an updated dialog will allow a user to choose which tax account the filing is for.

For more information, see [The Tax Accounts Screen](#).

## Jurisdiction Crossing Report

The **Jurisdiction Crossing** report has been added to Omnitracs Tax Manager.

The **Jurisdiction Crossing** report provides details about each time a vehicle crossed from one IFTA taxing jurisdiction into another. This report includes information such as the date, time, vehicle latitude/longitude, vehicle odometer, and the name of the jurisdictions the vehicle entered and departed.

For more information, see the Knowledge Base article, Jurisdiction Crossing Report.

## Software Corrections
