

# OMNITRACS TAX MANAGER 1.1 - NEW FEATURES AND ENHANCEMENTS

## Overview

Omnitracs Tax Manager will be released on Tuesday, March 31, and will contain the following new features, enhancements, and software corrections.

## Fuel Import Functionality Added

Users can now import fuel purchases in bulk, rather than entering fuel entries in one at a time. Multiple fuel vendors are supported, including ComData, Wright Express, Irving, Shell, TCH, Fleet One, and Tcheck.

For providers other than those listed, a generic fuel import template is also provided.

## Report Filtering Options

Filters have been added to Reports screens.

Users can now filter reports to obtain finer control over displayed data.

Users can specify a date range (limited to 92 days), a jurisdiction (or any combination thereof), and a vehicle (or any combination of vehicles in the Omnitracs database).

Access report filters by clicking on the **Filters Menu** , located on the left side of the screen. The **Filters** menu will appear.

The screenshot displays the 'Fuel Efficiency' report interface. On the left, a 'Filters' sidebar is open, showing 'Start Date' (01/01/2020), 'End Date' (03/25/2020), 'Jurisdiction' (71), and 'Vehicle ID' (7). The main area shows a table with columns: Vehicle ID, Distance, Fuel Consumed, and M.P.G. The table lists several vehicle IDs and their corresponding fuel consumption data. At the bottom, there are buttons for 'Clear All', 'Generate', 'Export CSV', and 'Export PDF'.

Vehicle ID	Distance	Fuel Consumed	M.P.G.
VEHAUDIT1		34	0.00
VEHAUDIT5		520	0.00
VEHAUDIT5		44	0.00
VEHAUDITOMIT		4	0.00
VEHAUDIT6		0	0.00
VEHAUDIT3		0	0.00
VEHAUDIT2		100	0.00
VEHAUDIT5		1174	0.00
VEHAUDIT2		33	0.00

## Fuel Efficiency Report

The Fuel Efficiency Report, used to view individual fueling records for each vehicle, is now available. It can be accessed via the **Reports** tab (**Reports > Fuel Efficiency Report**).

See the [Fuel Efficiency Report](#) page in the KB for more information.

## Software Corrections

Issue Key	Release Notes	Component
TM-1270	There was an issue where the Distance by Jurisdiction Report was missing some distance data. That issue has been resolved.	Reports Screen
TM-1188	Previously, entering five digits in the <b>Year</b> field while creating a new fuel record caused Omnitracs Tax Manager to stop functioning correctly. This issue has been resolved.	Fuel Screen
TM-1183	There were formatting and calculation issues with the California IFTA Tax Filing. These issues have been resolved.	Tax Filing
TM-1181	There was an issue in which the PDF produced via the Iowa Tax Filing did not show any of the tax calculation data. This issue has been resolved.	Tax Filing
TM-1180	There was an issue in which the Tax Filing PDF for Saskatchewan did not properly display the jurisdiction for fuel purchases in the corresponding column. That issue has been resolved.	Tax Filing
TM-1167	When entering a card number in the Fuel add pop up, users are prompted to use a previously entered credit card number.	Fuel Screen
TM-997	Users are now able to add a distance record without generating an error.	Distance Screen
TM-996	There was an issue in which the <b>Vehicle ID</b> field would not display a value after a record was selected in the <b>Fuel</b> screen. That issue has been resolved.	Fuel Screen
TM-995	There was an issue where users entering a date value past "12-31-9999" would cause Omnitracs Tax Manager to stop functioning correctly. This issue has been resolved.	Fuel Screen/ Distance Screen
TM-799	The Add/Edit Distance screen now contains a <b>Comments</b> field.	Distance Screen
TM-748	Previously, comments added via the Add/Edit Fuel Receipt screen were not being shown in subsequent screens. This issue has been resolved.	Fuel Screen
