

Intelligent Vehicle Gateway (IVG) 1312 – Production Release Notes

Updated April 16, 2024

Contents

Compliance – Hours of Service2

Compliance – Hours of Service

Improvements

OHOS-13709 – ODD - IVG is not allowing the driver to defer time when it should.

Fixed an issue where deferrable off-duty time was being incorrectly calculated when an off-duty period of 8 hours or more crosses a day boundary.

OHOS-7885 – Data Diagnostic Indicator is not activated for days after the initial Unidentified Driving Data Diagnostic occurred

Fixed an issue with the Unidentified Driving Data Diagnostic where it was not indicated as active on days where the diagnostic is present.

OHOS-13665 – Drivers enabled for PC & YM not seeing these on the IVG

Fixed an issue where drivers were inadvertently switched from their current ruleset to USA upon IVG startup.
